1. Doe J, Okafor N, Ramirez K. Long-term neonatal outcomes after fetal growth restriction surveillance: a multicenter follow-up. *American Journal of Obstetrics and Gynecology*, in review.

## INVITED TALKS

- |      |                                                                                                          |
|------|----------------------------------------------------------------------------------------------------------|
| 2023 | "Preeclampsia Prevention: What the Evidence Actually Says," Annual OB/GYN Grand Rounds, General Hospital |
| 2022 | "Cervical Length Screening in Practice," State Perinatal Quality Collaborative Conference                |

2021 "Fetal Growth Restriction: Surveillance and Timing of Delivery," Regional Maternal-Fetal  
Medicine Symposium

## CLINICAL STATEMENT

### (a) Past and current

My clinical practice centers on high-risk pregnancy care at General Hospital, with an emphasis on hypertensive disorders and fetal growth restriction. I see patients in clinic two days a week and cover labor and delivery four overnight shifts a month.

### (b) Proposed and future

I plan to expand the hypertension-in-pregnancy clinic into a regional referral service.
